

FISCO Reactor System

FLUKO®

Lab Fisco Reactor System has working capacity of 1L, 2L, 5L and 10L, suitable for dispersing, emulsifying, homogenizing, mixing and discharging under vacuum or pressure conditions. It can be equipped with various of high-efficiency macro mixers, high shear dispersing emulsifiers, reliable vacuum sealing system and temperature control system. A variety of sensor detection systems can simulate industrial production in a laboratory environment.
